

With up to 20 million monthly users, wetter.com is one of the most popular consumer weather services in Germany, Austria and Switzerland. More than 70 people at our locations in Munich, Berlin and Constance work on our products with plenty of passion and fun. Our team consists, among others, of meteorologists, editors, developers, technicians, designers, sales managers and data professionals. In addition to our weather products for web, mobile apps, and TV, wetter.com also offers weather data-driven business solutions that help companies optimize processes and leverage new business potential. We are a 100% subsidiary of ProSiebenSat.1 Media SE.

To strengthen our Data Team, at Munich or Constance, we are looking at earliest convenience for:

## Data Engineer / DevOps Engineer (m/w/d)

### Your Role

- You build innovative B2B data forecasting products together with our data scientists and backend team
- You define set-up and maintain CI/CD pipelines using modern cloud infrastructure
- You develop and implement scalable applications for automated data processing and predictions - from conception to prototyping to production
- You actively shape the evolution of our data architecture including DevOps processes and evaluate necessary tools and technologies

### Your Profile

- You have a degree in Computer Science, Data Science or equivalent qualification.
- You are well versed in setup and operations of cloud infrastructure and data pipelines, especially on AWS. Our data tech stack uses AWS, GCP, Databricks, and Snowflake
- You have good Python programming skills and experience in managing agile software projects in JIRA and Confluence
- You have practical experience with DataOps and MLOps from bringing data applications from analysis to live operations

### Your Benefits

- An own area of responsibility with space to develop your own ideas and concepts
- Our corporate culture is characterized by team spirit, open communication and dynamic atmosphere, flat hierarchies and short decision-making paths
- We work in a hybrid model with home office and office presence
- Uncomplicated co-operation: We have a flat You culture with no Mr or Mrs and are detached from dress codes
- A variety of perks, social benefits and employee services in a leading Media Company
- Promotion and training-on-the job is very important to us
